OWNER'S MANUAL

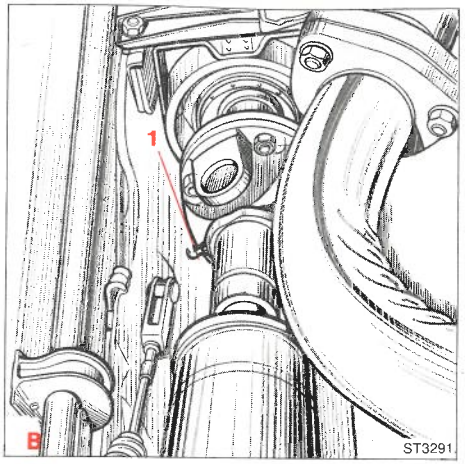

A CHECK AND CHANGE

Check the oil level in the differential at the prescribed intervals; to do so remove filler plug 1; the oil level shall be flush with the lower edge of the port. Refit plug it. Proceed as follows to change the lubricant. (This operation shall be carried out when the unit is hot).

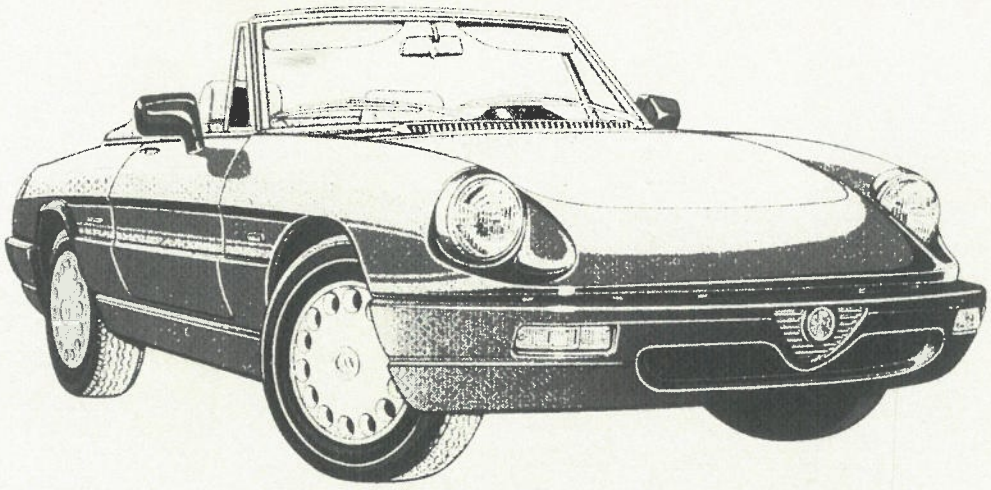

- Remove filler plug 1 and drain plug 2. Drain off oil completely.
- Clean drain plug 2 and screw it on.
- Fill with oil of the prescribed type and grade (see page 91) through port 1. Check to ensure the level is flush with the lower edge of the port; clean the filler plug and screw it on.

B DRIVE-SHAFT SLIP-YOKE GREASING

It is necessary to grease drive-shaft slip yoke 1 at the prescribed intervals; to be sure that this operation is carried out in the correct way we suggested you should contact one of the Alfa Romeo After-Sales Service Centres.

CONDUITE ET ENTRETIEN

A VÉRIFICATION DE L'HUILE DU DIFFERENTIEL

Aux cadences établies vérifiez le niveau de l'huile dans le différentiel en déposant le bouchon de remplissage 1. Le niveau doit atteindre le ras bord inférieur de l'orifice.
Remontez le bouchon 1.
Pour la vidange (à effectuer à chaud) opérez ainsi:

- Déposez le bouchon de vidange 2 et le bouchon de remplissage 1, et laissez couler complètement l'huile.
- Nettoyez le bouchon de vidange 2 et remettez-le en place.
- Versez l'huile neuve (quantité et type spécifiés à la page 91) à travers l'orifice de remplissage 1 jusqu'à atteindre le bord inférieur.
  Nettoyez le bouchon et remettez-le en place.

Aux périodicités établies il faudra effectuer le graissage du manchon coulissant 1 de l'arbre de transmission; pour que cette opération soit effectuée correctement, veuillez vous adresser aux Services Autorisés Alfa Romeo.
