How to Enjoy Your XCD 9120 AM/FM Stereo Receiver/Compact Disc Player

Welcome!

What you're holding in your hands is no ordinary owner's manual. We've tried to make the instructions in this owner's manual clear and easy to follow. If you take a few minutes to look through it, you'll learn how to use all of the features on your new Jensen car stereo for maximum enjoyment.

For your Jensen stereo to work right, it must be installed correctly. The enclosed installation manual will show you how to install your new stereo like a pro. It's a good idea to read all of these instructions before you begin the installation. Most installations are straightforward and can be handled by a do-it-yourselfer with the right tools, patience, and the ability to follow instructions. But, do-it-yourself installation isn't for everyone. If you still don't feel confident after reading this book, consider turning the installation job over to someone better suited to it.

Warranty Service

If your Jensen stereo should ever require service, you will need to have the original dated receipt. If you ever need to return the unit for any reason, a[illegible] include the receipt with the product.

JENSEN®

Thank you for buying my CD player. Yes, that's right, MY CD player. My name is Matt and I'm the Product Manager in charge of car eletronics at Jensen. I'm the guy who thought up what features the XCD9120 should have, how it should work, and where to put all the buttons so they would be easy for you to reach.

Together with a very dedicated group here at Jensen, I sweated this CD player from a dream, though design and manufacturing, and now into your hands. So you see, I really do feel that this is my CD player in a way. So I just wanted to say thanks to you for your vote of confidence in me when you bought the Jensen XCD9120. I don't think you will be disappointed.

I've used the XCD9120 in my own car for quite a while now and I just love it! I use all of the electronics we make in my own car long before they are manufactured. (I love this job. They actually *pay* me to put all this great equipment in my car.) I also buy and use a lot of the stuff our competition makes too, and I think the XCD9120 really blows them away.

The way the buttons are arranged, I had no probleam finding them without looking at the radio. After a couple of round trips to work, I didn't even think about it when I adjusted the volume, even with gloves on! I hate some of those radios that you can never tell which button you are pushing unless you look at it.

I also added some really great features. With the XCD9120, you set the volume level so every time you start your car, the radio plays at that level. No more blasting radio when you crank the car up in the morning. It also has 100 steps on the volume control, not 30 or 40 like some other CD players on the market.

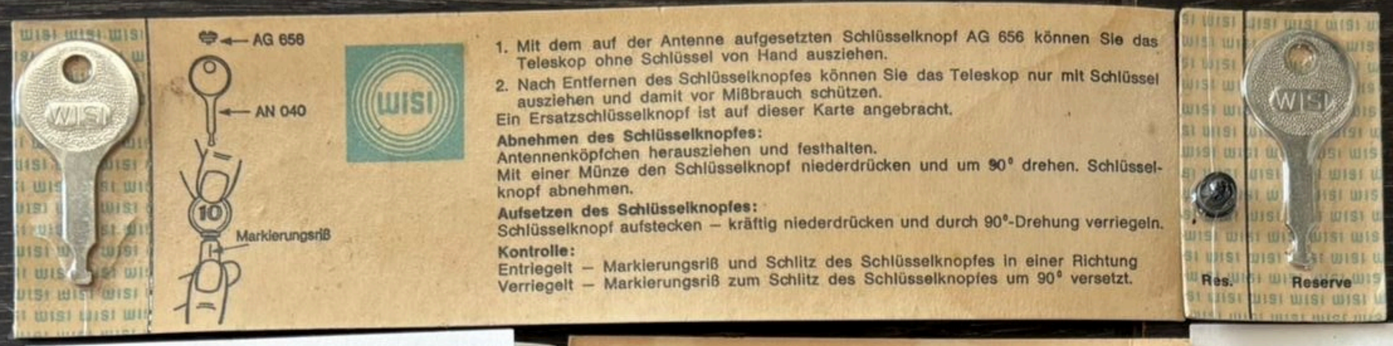

But that's not all. You can program the XCD9120 to play your CD's tracks in any order you want. I don't know about you but I don't usually listen to all the songs on a CD. There are usally 3 or 4 songs on a disc that I like. With the XCD9120, you tell it what songs to play, up to 10 in the order you want to play them!

There's more, but I don't want to bore you. It's all in the owner's manual. (P.S. I hope you find the owner's manual easy to handle. I've tried really hard to make it simple and to the point.) I think you will enjoy the XCD9120 as much as I do. Let me know what you think.

Write to me at the address below. I'd love to hear from you.
