Jaguar E-Type Series III V12 2+2 (RHD)

Manufactured on **4 February 1972**, this Jaguar E-Type Series III V12 2+2 is finished in its factory-correct **Signal Red over Black interior**, as confirmed by an official **Jaguar Cars Ltd. factory letter**.

Supplied new via **Page & Scott (UK)** and originally registered as **SNO 578 K**, the car remained **registered to its first owner until October 1991**, despite periods of storage and dealer involvement, as confirmed by period correspondence from former owners.

The history file includes **handwritten provenance letters**, a **period inspection and valuation by Jaguar specialists (1991)** describing the car as being in *very good condition*, and extensive UK service documentation.

The car passed MOT testing in 2009 and again in **2010 at a recorded mileage of 69,997 miles**, shortly before being purchased in England and **driven to Germany under its own power** by the current owner.

Since its import in 2010, the car has had **one single owner in Germany**, holds **historic (H) registration**, and has covered only limited mileage. The current owner is a qualified mechanic and has carried out ongoing preventative maintenance, including work to the braking system, steering, rear axle, suspension and brake servo.

A well-documented, correctly specified and honestly maintained example, offered with a notably strong and transparent ownership history.
